FUEL PROCESSING TECHNOLOGY

Contents Vol. 42

Vol. 42, No. 1

Obituary 1

Importance of pretreatment on regeneration of a $Pt–Sn/Al_2O_3$ catalyst
J.C. Afonso, D.A.G. Aranda and M. Schmal (Rio de Janeiro, Brazil) and R. Frety (Villeurbanne, France) 3

Solvent refined coal – studies on the behaviour of an iron catalyst
S.R. Dwivedi, P.K. Dasgupta, P.K. Chatterjee, A.N. Bose, S.N. Mukherjee, S.S. Chatterjee and B.B. Brahmachari (Bihar, India) 19

Desulfurization of petroleum fractions by oxidation and solvent extraction
F. Zannikos, E. Lois and S. Stournas (Athens, Greece) 35

Mössbauer spectroscopic studies on the transformations of iron-bearing minerals during combustion of coals: Correlation with fouling and slagging
L.C. Ram and P.S.M. Tripathi (Dhanbad, India) and S.P. Mishra (Varanasi, India) 47

Vol. 42, Nos. 2+3

Special Issue: Trends in Natural Gas Utilisation

Preface 63

Economic aspects of natural gas conversion
Economics of natural gas conversion processes
M.J. Gradassi (Naperville, IL, USA) and N.W. Green (Irvine, CA, USA) 65

Conversion of natural gas to syngas
Tubular reforming and autothermal reforming of natural gas – an overview of available processes
I. Dybkjær (Lyngby, Denmark) 85

Catalytic partial oxidation of natural gas to syngas
S.S. Bharadwaj and L.D. Schmidt (Minneapolis, MN, USA) 109

Direct conversion of natural gas to oxygenates
Homogeneous gas-phase partial oxidation of methane to methanol and formaldehyde
G.A. Foulds (Townsville, Australia) and B.F. Gray (Sydney, Australia) 129

Catalytic synthesis of methanol and formaldehyde by partial oxidation of methane
T.J. Hall, J.S.J. Hargreaves, G.J. Hutchings, R.W. Joyner and S.H. Taylor (Liverpool, UK) 151

Direct conversion of natural gas to hydrocarbons
Surface chemistry in the oxidative coupling of methane
G.A. Martin and C. Mirodatos (Villeurbanne, France) 179

Catalytic oxidative coupling of methane – reaction engineering aspects and process schemes
M. Baerns and L. Mleczko (Bochum, Germany) 217

Pyrolysis of natural gas: chemistry and process concepts
A. Holmen, O. Olsvik and O.A. Rokstad (Trondheim, Norway) 249

Use of natural gas in chemical energy storage systems
The chemistry of methane reforming with carbon dioxide and its current and potential applications
J.H. Edwards and A.M. Maitra (North Ryde, Australia) 269

Novel methods of methane activation
Homologation of methane under non-oxidative conditions
H. Amariglio (Vandœuvre-les-Nancy, France), J. Saint-Just (La Plaine Saint-Denis, France) and A. Amariglio (Vandœuvre-les-Nancy, France) 291

Methane activation in homogeneous systems
J.A. Labinger (Pasadena, CA, USA) 325

Combustion of natural gas
Catalytic combustion of methane
J.H. Lee and L. Trimm (Kensington, Australia) 339
